

PICS for PECS 2003[®]

Welcome to PICS for PECS 2003! This CD contains all of the 2002 icons and over 200 new icons. The icons on this CD are organized by broad categories: **alphabet, animals, attributes (colors, sizes, shapes), body parts, food/drinks, locations, numerals, sentence starters, songs**, and over 300 **non-categorized** icons. Several of the icons are included more than once but with different words printed on them. We also include several of these pictures with British English “translations” under the “**UK Conversions**” category.

Rayna Bondy has been our artist for several years now and continues to contribute to our growing collection. In addition, Karen Kaler from RSVP Designs in Delaware and Mark Davis of Mackerel Limited in Brighton, United Kingdom, contributed their artwork for several of our newest images.

We offer many thanks to those of you who submitted ideas for new icons—keep them coming and we’ll do our best to add them to our next edition! We extend a special thanks to all of the consultants at Pyramid Educational Consultants for their regular supply of ideas and to Sally Wemmers, CCC/SLP for her ideas, especially our new “Look!” icon.

The images on this CD are in jpeg format. Use them as you would any clip art images. This means that you must import these images into documents that support graphics in jpeg format. For example, the images can be imported into Microsoft Word[®] documents in a number of ways. Here’s one:

1. Insert the **Pics for PECS 2003** CD into the CD tray of your computer.
2. Open an existing Word document or create a new one.
3. Choose **Insert** from the tool bar at the top of the program.
4. Click **Text Box** from the dropdown menu.
5. Using your mouse, draw a box in the field of your document. Note: the cursor will change to a crosshair. The cursor will automatically move to the box you’ve drawn.
6. With the cursor in the box, choose **Insert** again from the tool bar and click **Picture**, then **From File**.
7. When the new window opens, use the dropdown menus at the top of this window to move to the CD drive.
8. Highlight the picture you would like to insert and choose **Insert** at the lower right of the window.
9. If you are using an image with a colored background and you want the color to fill the entire text box, add these steps between steps #5 and #6:
 - a. Choose **Format** from the tool bar at the top of the program.
 - b. Click **Textbox**. A new window will appear with a tool bar at the top.
 - c. From this toolbar, select **Textbox**.
 - d. Reset all four margins to 0.
 - e. Select **OK** from lower right corner
10. Several pictures can be added to a single document depending on the size of the pictures added. A picture can be moved by clicking the edge of the text box and dragging it, or resized by clicking the picture and then clicking the small black box in the corner of the picture and dragging. The text box will automatically resize with the picture.

Now for the fine print: *Copyright, 2001-2003 by Pyramid Educational Products, Inc. All rights reserved.
